

Oxford PPE publishes AAA.

Three As. Sounds doable, right?

↓ swipe to see the real bar

what they publish:

AAA

Three As. The minimum entry requirement.

that's the floor, not the target

the reality:

Most common accepted grade is A*A*A*.

Three grade jumps above the published offer.

Published

~~AAA~~

the "minimum"

Reality

A*A*A*

what gets accepted

The gap between published and real is three grade jumps.

~~AAA~~ → A*A*A*

AAA is the floor. A*A*A* is the norm.

the published grade is not your target

what to do instead:

TARA test performance matters more than grades here.

-
- Prepare for TARA alongside your A-levels
 - Research the actual accepted grade profile
 - Treat AAA as the floor, not the target
 - Build your application around the real bar

TARA is the new admissions test from 2027 entry

Full PPE data in my cheat sheet.
